See page 8 for the revisions to the panel schedules on E4.1

Questions Received:

1. See the Panel F schedule. We are to take a 20 amp circuit from Panel F to Room 100; can you give me some guidance as to where Electric Room 102 and Room 100 are located. Also, what type of fixtures am I to install? One Note, I’m assuming the Electric Room 102, where existing Panel F resides, is not the Electric Room 102 from our project?

Panel “F” is located down the hall from the new gym. You are not taking a circuit from Panel “F” to Room 100. There are three new light fixtures in Corridor 109 that need to connect to the existing corridor light circuit. Reference Keyed Note #3 on E10.0. The existing circuit F-22 serves the existing corridor lights. The existing corridor happens to be labeled “Room 100” on the existing panel schedule.
