EIGHTH GRADE PROMOTION - CLASS OF 2020

LESSONS IN ENGINEERING

The 6th grade Math classes worked on bridge building projects in June. The kids designed and built balsa wood bridges to their own specifications. After the bridges were finished, we tested them to see how much weight their bridge could hold. They also checked the efficiency of their bridge by dividing the weight held by the weight of their bridge. The team of Coda Graham and Madison Fay won both the most weight held (29.4 pounds) and best efficiency rating (669.0). Madison Brodenick came in 2nd holding 26.2 pounds and an efficiency rating of 668.7. The team of Chase Collins and Ryan Wickert came in 3rd holding 22.0 pounds and an efficiency rating of 642.3. It was a great way to put Math practices into real-world applications.
